CERTIFICATE

I hereby certify that Mr./Ms. _____ (Roll Number: 24302____), Student of Vidyalankar School of Information Technology, studying in T.Y. B.Sc. (Information Technology / Data Science) Semester V has completed a C.E. project titled “NAME OF THE PROJECT” at “NAME OF THE ORGANISATION” during the academic year 2026-27.

DECLARATION

I, Mr. / Mrs. **Name of the Student** Student of **Vidyalankar School of Information Technology**, studying in **T.Y. B.Sc. in Information Technology / Data Science**, hereby declare that I have completed the C.E. project entitled “**Name of the C.E. Project**” during the academic year 2026-27

The information presented in this report has been collected through interactions, observations, interviews, surveys, organizational records, and project activities undertaken during the field visits.

Due credit is extended on the work of Literature/Secondary Survey by endorsing it in the Bibliography as per prescribed format.

Signature of the Student with Date

Name of Student

ACKNOWLEDGEMENT

We express our sincere gratitude to the **University of Mumbai** and **Vidyalankar School of Information Technology** for providing us an opportunity to undertake this Community Engagement Project.

We extend our heartfelt thanks to our **Faculty Mentor, Guide Name**, for his/her constant guidance, encouragement, and constructive feedback, which greatly helped us in completing this project successfully.

We are equally grateful to **Organisation Name** for granting us the opportunity to visit and work on the project. The support and cooperation received from the staff members gave us meaningful exposure and helped us connect our academic knowledge with the available Sustainable Development Goal (**SDG Number**).

Lastly, we wish to thank our peers and faculty members for their support and motivation, which made this project a collaborative and enriching experience.

ABSTRACT

The abstract should contain:

- Name of the organization
- Problem identified
- Objective of the project
- Method of requirement gathering
- Proposed solution
- Technologies used
- Key outcomes achieved
- Impact on organization/community

(250–300 words)

CHAPTER 1: INTRODUCTION

1.1 Project Background

This section introduces the project and provides the context in which it was undertaken. It should describe the organization or community, the area of work related to the project, and the circumstances that led to the identification of the problem. The section helps readers understand the significance and relevance of the project.

1.2 Problem Statement

This section explains why the project is necessary and how the proposed solution can help address the identified problem. It should justify the development of the project from both organizational and community perspectives. History and mission of the NGO

1.3 Need for the Project

This section explains why the project is necessary and how the proposed solution can help address the identified problem. It should justify the development of the project from both organizational and community perspectives.

1.4 Objectives

This section lists the goals that the project aims to achieve. Objectives should be specific, measurable, and aligned with the identified problem.

Primary Objectives

The main goals that directly address the problem.

Secondary Objectives

Additional goals that enhance the effectiveness, usability, or long-term value of the solution.

1.5 Scope

This section defines the boundaries of the project by specifying what is included and what is excluded. It should clearly outline the features, functions, and deliverables that will be completed within the project duration.

1.6 SDG Alignment

This section explains how the project contributes to one or more United Nations Sustainable Development Goals (SDGs). Students should identify the relevant SDG(s) and describe the connection between the project objectives and the selected goal(s).

CHAPTER 2: REQUIREMENT ANALYSIS AND LITERATURE REVIEW

This chapter presents the process of understanding the problem through stakeholder interactions, observations, and requirement gathering activities. It also reviews existing solutions, technologies, and research studies related to the project domain. The chapter establishes the need for the proposed solution by identifying gaps in the current system and existing approaches.

2.1 Methodology Adopted

This section describes the approach used to gather information and understand the problem. Students should mention the methods used during field visits and stakeholder interactions.

2.2 Stakeholder Interactions

This section presents details of the individuals or groups consulted during the project. It should explain how their inputs contributed to understanding the problem.

2.3 Domain Overview

This section introduces the project domain and provides theoretical background relevant to the problem area.

2.4 Existing Process Analysis

This section explains the current workflow or system being followed before the proposed solution. Students should identify inefficiencies, challenges, and limitations.

2.5 Existing Solutions and Related Work

This section reviews existing software, systems, applications, research papers, case studies, and methodologies related to the project.

2.6 Technologies Studied

This section discusses the technologies evaluated before selecting the final technology stack.

2.7 Research Gap and Need for Proposed Solution

This section identifies the limitations of existing solutions and explains why a new or improved solution is required.

2.8 Challenges Identified

This section summarizes the problems and difficulties identified through stakeholder interactions and observations.

CHAPTER 3: PROPOSED SOLUTION

This chapter presents the solution proposed to address the problem identified during the requirement gathering phase. It explains the overall approach, architecture, technologies selected, and the expected advantages of the proposed system.

3.1 Solution Overview

This section provides a high-level description of the proposed solution and explains how it addresses the identified problem.

3.2 System Architecture

This section describes the overall architecture of the proposed system and the interaction between various components.

3.3 Process Flow Diagram

This section illustrates the workflow of the proposed system through diagrams or flowcharts.

3.4 Module Description

This section explains each module of the proposed system and its intended functionality.

3.5 Advantages of Proposed Solution

This section highlights the expected benefits of the proposed system.

CHAPTER 4: SYSTEM DESIGN

This chapter explains the detailed design of the proposed system using diagrams, models, and design specifications before implementation begins.

4.1 System Design Overview

This section provides an overview of the design approach adopted for the project.

4.2 Use Case Diagram

This section identifies the actors and functionalities of the system.

4.3 Workflow Diagram

This section describes the sequence of activities performed in the system.

4.4 Module Design

This section elaborates on the internal design of individual modules.

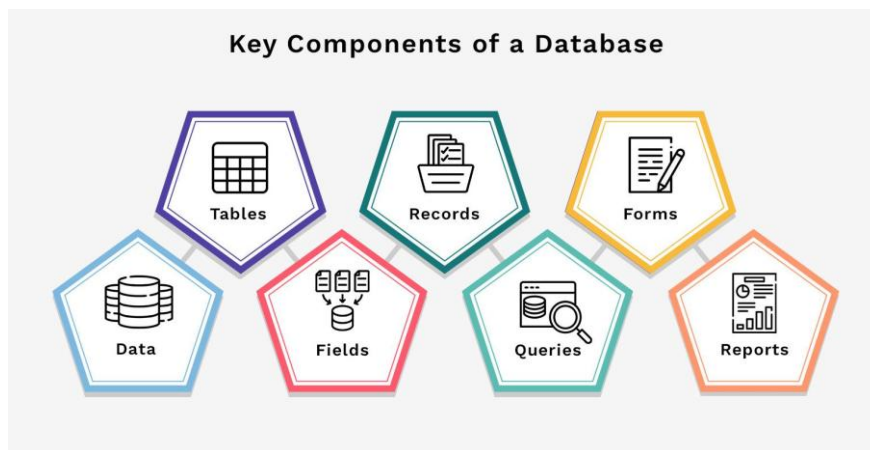

Figure 1: Key Component of Database

CHAPTER 5: PROJECT IMPLEMENTATION

This chapter describes the actual development and implementation of the project.

5.1 Development Methodology

This section explains the development approach followed during implementation.

5.2 Module-wise Implementation

This section explains how each module was developed.

5.3 User Interface Solution

This section discusses the development of user interfaces.

5.4 Screenshots of Developed Solution

This section provides evidence of project implementation.

CHAPTER 6: TESTING AND VALIDATION

This chapter verifies whether the developed solution meets its intended objectives and functions correctly.

6.1 Test Cases

This section presents the test scenarios used to validate system functionalities.

6.2 Test Results

This section summarizes testing outcomes.

6.3 User Acceptance Testing

This section documents validation by stakeholders or users.

6.4 Feedback from Stakeholders

This section summarizes suggestions received during validation.

6.5 Performance Evaluation

This section evaluates the effectiveness of the solution.

CHAPTER 7: RESULTS AND IMPACT ASSESSMENT

This chapter presents the outcomes achieved after implementation and evaluates the impact on stakeholders and the organization.

7.1. Deliverables Submitted

This section lists all project outputs provided to the organization. (Like App/ System, Database, Reports, Documentation, LAB MANUAL)

7.2. Results Achieved

This section discusses the achievements obtained through the project.

7.3. Impact on Organization

This section describes organizational benefits resulting from the project.

7.4. SDG Contribution

This section demonstrates alignment with Sustainable Development Goals.

CHAPTER 8: CONCLUSION AND FUTURE SCOPE

This chapter summarizes the project, highlights major findings, and recommends future improvements.

8.1. Conclusion

This section provides an overall summary of the project and its achievements.

8.2. Key Findings

This section presents significant observations and outcomes.

8.3. Recommendations

This section suggests improvements for the organization and future users.

8.4. Future Enhancements

This section discusses additional features that can be developed in future versions.

Research Papers

- [1]. Reference Paper 1
- [2]. Reference Paper 2
- [3]. Reference Paper 3

Citing needs to be taken from Google Scholar by following the steps:

1. Go to Google Scholar (Link: <https://scholar.google.com/>)
2. Type the title of your paper in Search Bar.
3. Find the paper you have referred from the list of papers published by the authors on same or similar topic.
4. Click on **Cite** option present at the bottom of each paper.
5. A new popup will open, indicating various citing formats. **You need to select MLA format**

Books Referred

- [1]. Books referred 1
- [2]. Books Referred 2

Citing of Books needs to be done in the format mentioned for citing Reference Papers.

Annexures (Highly Recommended)

Each Annexure should start from fresh page

Annexure A*

Field Visit Photographs (Day wise photos needs to be attached)

Annexure B*

Survey Questionnaire / Interview Questions (Prepared in consultation with your Mentor. If you have both then they needs to be attached under separate ANNEXURES)

Annexure C*

Interview Questions. (If Applicable)

Annexure D*

Reporting Officer Feedback Form(s) on the prepared project (Blank Format)

Annexure G*

Source Code Repository Link and also provide the list of the contents uploaded (GitHub)

Annexure H

User Manual

*** Mandatory Annexures**
